1. The drawings are objected to because Figures 15 and 16, which are noted in the specification as PRIOR ART, are missing. So is Figure 17. Corrected drawing sheets are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

2. It is noted that the originally filed specification contained a Brief Description of the Drawings section while the substitute specification filed 1/17/03 (or 1/23/2003) does not. Applicant needs to place such a section in the newly submitted specification.

3. Claim 8 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 8, step c), "provide" should be --providing--. Also, a claim should be in single sentence form. In claim 8, the third line from the last, the period at the end of the line should be changed to a comma and "Whereby" in the second-to-last line should be in lower case. In the third and fourth lines from the last line of claim 8, the recitation "various available methods" is indefinite in that the scope of same can not be ascertained. Applicant should specify what these application methods are.

4. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claim 8 is provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 2 of copending Application No. 09/982,044. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claim of

compending application 09/982,044 and instant claim 2 each set forth essentially the same subject matter of providing a pavement marker of two parts, each part having inclined planar faces with reflective cells by employing injection mold tooling to make the pavement marker. The -044 application makes a hollow pavement marker which is subsequently filled and agglutinated in-situ on the roadway, while the instant claims mold the marker without such filling. However, it is well settled that the elimination of a step and its consequent function is obvious as long as the remaining steps fulfill their same function, which is true in the instant case. Hence, instant claim 8 is considered to be obvious over claim 2 in compending application 09/982,044.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not yet been patented.
